Reference number(s)
4499-A

- Esophageal achalasia
- Chronic anal fissure
- Essential hand tremor
- Focal limb dystonia
- Hemifacial spasm
- Isolated oromandibular dystonia
- Laryngeal dystonia
- Simple motor tics
- Vocal tics

## Daxxify

- Cervical dystonia

## Dysport

- Cervical dystonia
- Spasticity
- Blepharospasm
- Hemifacial spasm
- Isolated oromandibular dystonia

## Myobloc

- Cervical dystonia
- Chronic sialorrhea

## Xeomin

- Chronic sialorrhea
- Upper limb spasticity
- Cervical dystonia
- Blepharospasm

All other indications will be assessed on an individual basis. Submissions for indications other than those listed in this criteria should be accompanied by supporting evidence from Medicare approved compendia.

## Exclusions

Coverage will not be provided for cosmetic use.

## Coverage Criteria

### Botox

#### Overactive Bladder with Urinary Incontinence

Authorization of 12 months may be granted for the treatment of overactive bladder with symptoms of incontinence, urgency, and frequency in adults who have had an inadequate response to or are intolerant of an anticholinergic medication.

#### Detrusor Overactivity Associated with a Neurologic Condition

Authorization of 12 months may be granted for the treatment of urinary incontinence associated with a neurologic condition (e.g., spinal cord injury, multiple sclerosis) in member 5 years of age or older who have had an inadequate response to or are intolerant of an anticholinergic medication.

#### Chronic Migraine Prophylaxis

Authorization of 6 months (two injection cycles) may be granted for the treatment of chronic migraine headache when the member has migraine headaches at least 15 days per month and headaches last 4 hours a day or longer.

#### Spasticity

Authorization of 12 months may be granted for the treatment of spasticity in members 2 years of age and older.

#### Cervical Dystonia

Authorization of 12 months may be granted for the treatment of adults with cervical dystonia.

#### Primary Axillary Hyperhidrosis

Authorization of 12 months may be granted for the treatment of primary axillary hyperhidrosis that is inadequately managed with topical agents.

#### Blepharospasm and Strabismus

Authorization of 12 months may be granted for the treatment of strabismus and blepharospasm associated with dystonia, including essential blepharospasm or VII nerve disorders in members 12 years of age and older.

## Esophageal Achalasia

Authorization of 12 months may be granted for the treatment of esophageal achalasia in adults who are considered poor surgical candidates for pneumatic dilation or surgical myotomy.

## Chronic Anal Fissures

Authorization of 12 months may be granted for the treatment chronic anal fissures in members with inadequate response to conservative or pharmacologic treatment.

## Essential Hand Tremor

Authorization of 12 months may be granted for the treatment of disorder of essential tremor when the following conditions are met:

- The member has a high amplitude tremor that disrupts activities of daily living
- The member experienced an inadequate response to oral pharmacotherapy such as propranolol and primidone.

## Focal Limb Dystonia

Authorization of 12 months may be granted for the treatment of focal limb dystonia.

## Hemifacial Spasm

Authorization of 12 months may be granted for the treatment of hemifacial spasm (cranial nerve VII disorder) in adults.

## Isolated Oromandibular Dystonia

Authorization of 12 months may be granted for the treatment of isolated oromandibular dystonia in adults.

## Laryngeal Dystonia

Authorization of 12 months may be granted for the treatment of adductor type laryngeal dystonia (adductor-type spastic dysphonia).

## Simple Motor Tics

Authorization of 12 months may be granted for the treatment of bothersome simple motor tics in adolescents and adults when the benefits of treatment outweigh the risks.

## Vocal Tics

Authorization of 12 months may be granted for the treatment of severely disabling or aggressive vocal tics in older adolescents and adults when the benefits of treatment outweigh the risks.

## Daxxify

Authorization of 12 months may be granted for the treatment of adults with cervical dystonia.

## Dysport

### Cervical Dystonia

Authorization of 12 months may be granted for the treatment of adults with cervical dystonia.

### Spasticity

Authorization of 12 months may be granted for the treatment of spasticity in members 2 years of age and older.

### Blepharospasm

Authorization of 12 months may be granted for the treatment of blepharospasm in adults.

### Hemifacial Spasm

Authorization of 12 months may be granted for hemifacial spasm (cranial nerve VII disorder) in adults.

### Isolated Oromandibular Dystonia

Authorization of 12 months may be granted for the treatment of isolated oromandibular dystonia in adults.

## Myobloc

### Cervical Dystonia

Authorization of 12 months may be granted for the treatment of cervical dystonia in adults.

### Chronic Sialorrhea

Authorization of 12 months may be granted for the treatment of chronic sialorrhea in adults.

## Xeomin

### Chronic Sialorrhea

Authorization of 12 months may be granted for the treatment of chronic sialorrhea in members 2 years of age and older.

### Upper Limb Spasticity in Adults

Authorization of 12 months may be granted for the treatment of upper limb spasticity in adults.

### Upper Limb Spasticity in Pediatric Members

Authorization of 12 months may be granted for the treatment of upper limb spasticity in pediatric members 2 to 17 years of age, excluding spasticity caused by cerebral palsy.

Reference number(s)
4499-A

## Cervical Dystonia

Authorization of 12 months may be granted for the treatment of adults with cervical dystonia.

## Blepharospasm

Authorization of 12 months may be granted for the treatment of blepharospasm in adults.

# Dosage and Administration

The lowest effective dose and longest dosing interval that produces the desired clinical effect should be used.
